

MICRODRIED OFFERS THE BEST DRIED FRUITS AND VEGETABLES IN THE PET FOOD INDUSTRY.

MicroDried® offers innovative ingredient solutions in 16 different varieties, specifically for pet food applications, of 100% pure fruit and vegetable products and select organics. Our MicroDried process preserves the natural integrity and nutritional value of our fruits and vegetables - keeping their superior taste, color and texture.

Our pets deserve a balanced diet. With MicroDried Ready-to-Eat products, you can give them what they crave and what pet parents can be confident in feeding them. We offer you the flexibility to add our dried fruits and vegetables to just about any meat or vegan-based, dry or wet pet food, pet treats or health supplement.

MicroDried helps pet food formulators create cleaner labels with our 100% fruits and vegetables by using these products to replace grains, stop the use of synthesized vitamins and minerals, and instead give you the opportunity to provide natural micronutrients in your product recipe.

Who's Ready to TREAT?

WHY CHOOSE MICRODRIED?

- Certified Ready-to-Eat
- 100% fruit and vegetable products
- Easy-to-add nutrition for a balanced diet
- Variety of colors, tastes and textures
- Perfect for toppers, mix-ins and blends
- Sustainable sourcing through an integrated supply chain
- Single ingredients for clean labeling
- Highest food quality and safety standards
- Ambient handling and storage with 2-year shelf life
- Short lead times and low MOQ

MicroDried is prepared to help develop your next pet food creation. Our expertise in new product development can provide you with the exact fruit or vegetable ingredients you want. Get ready to create super food for those super pets!
